PIPE FITTERS

• Project Leaders/Senior Helpers

Capable of training/leading staff, you are TSSA qualified and proficient in SMAW, GMAW, GTAW and MIG for carbon and stainless steel piping. Able to interpret drawings and schematics, you have 5 years' experience in heavy industrial piping or process systems. You must have knowledge of and a background in installing pumps, motors, instrumentation and components. The rate of pay is \$17.76 to \$26.39 per hour for day or afternoon shifts (with a \$1.50/hour premium for afternoon shifts). Please apply to: eryk.rivard@howardmarten.com

INTERMEDIATE DESIGNER

You will be responsible for the design, layout and fabrication detailing of HMCL equipment. Your exceptional organizational and communication skills, a strong aptitude for working with details, and a degree or diploma in Mechanical Engineering Technology are combined with 4 years' experience in packaged piping systems (as pertaining to the mining, power generation, petro-chemical and/or pulp and paper industries). As well, you have demonstrated expertise with drafting principles and a solid understanding of electrical wiring for industrial applications to meet CEC, NEC and IEC and practices for piping design to meet ANSI B31.1 and API-614, structural steel to meet CISC and NBC, and hydraulic design to meet JIC and NFPA. A background in SolidWorks 3D drawing package is required along with knowledge of AutoCAD (Release 14 or higher). Please apply, to: eng@howardmarten.com and include **HMCL DEG Intermediate Designer 06-02-17** in the subject line.

Connect with a company that has an international reputation. We offer opportunities for advancement, an attractive benefits package and a pension plan. Please apply to the appropriate e-mail address or to: **Fax: (905) 831-5807**
